

## TP Aviation Books

Publication Mid-April. With the dreadful state of European shipping at present, I cannot give you a definite date, but I will keep you informed.

**UH-60 Black Hawk** by Robert Burik

<https://www.trackpadpublishing.com/uh-60-black-hawk>

The Sikorsky UH-60 Black Hawk was designed to replace the aging Bell UH-1 Huey during the 1970s.

It made its combat debut in 1983 during Operation Urgent Fury, the invasion of Grenada. Black Hawk has participated in every major US Army campaign since. Upgrades have included the UH-60L, UH-60A+ and UH-60M, all detailed in this book.

This is the most thorough in-depth photo-study of this successful helicopter to be published to date.

**RB001, A4 landscape, 126 pages, over 400 photos, full colour, £21.50**
